### **EXAMINER'S COMMENT**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 6,603,593 B2 discloses an apparatus for depolarizing light which comprises a beam splitter, two polarization maintaining fibers, a beam combiner, and a light source. It is noted, however, that the invention of the '593 patent comprises two additional output fibers coupled between the beam splitter and the beam combiner and does not appear to use the same type of light source(s) as recited by present claims. Therefore, claims 1, 3, 7, 8, 10, 14, and 17-20 are still deemed allowable over the prior art of record.
